

Fenner Drives Product Testimonial

PowerTwist Plus

Glass

Schott

Dear Fenner Drives,

We have been using PowerTwist Plus link belting for 3 years and we are very satisfied with the product and continue to use it.

Before, we were using polyurethane belting which we had to heat the belt to weld it, we continuously had problems with belt breakages, and we had to stop the production lines very often. To weld the polyurethane belt took us approximately 10-15 minutes, and every day we had to deal with a minimum of 5-10 stoppages.

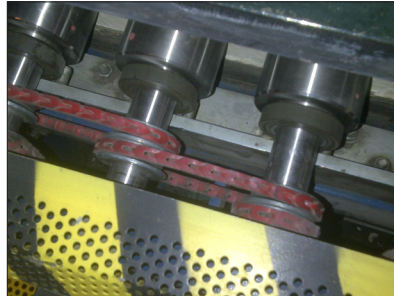

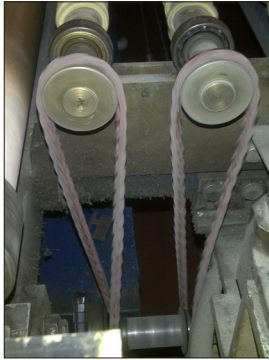

With PowerTwist Plus we have eliminated these stoppages and losses to zero.

I would like to share our satisfaction and this very positive result.

Best Regards,

Mehmet Uzunoğlu
